About

I'm a backend developer who genuinely enjoys turning real-world challenges into well-designed, usable products that people can actually benefit from. Beyond just making things work, I care deeply about software engineering principles — writing code that is structured, maintainable, and built to last. I believe the best work happens in collaborative environments where teammates support each other, share knowledge openly, and genuinely enjoy the process. Currently open to new opportunities and excited to join a team where I can grow, contribute, and help build something meaningful together.

Technical Skills

Languages & Web: JavaScript, TypeScript, Node.js, HTML5, CSS3, EJS, Handlebars

Frameworks & APIs: NestJS, Express.js, GraphQL, RESTful APIs, Swagger

Databases & Data Layer: PostgreSQL, Redis, MongoDB, MySQL, Elasticsearch, Prisma, TypeORM, Sequelize, Mongoose

Database Engineering: Database Architecture, Partitioning, Replication Concepts

Architecture & Messaging: Event-Driven Architecture, Modular Monolith, Microservices (Basics), Message Brokers (RabbitMQ), System Design

Real-Time Systems: WebSocket (Socket.IO)

DevOps & Tooling: Docker, Git, GitHub Actions (CI/CD), Amazon S3, Linux / Bash

Testing & Quality: Unit Testing (Jest, Vitest), Integration Testing (Supertest), API Testing

Professional Experience

Backend Developer — *Dec 2025 – Apr 2026*
Droplinked — *Abu Dhabi, UAE | Remote*

- Migrated legacy services to a modular NestJS architecture, refactoring core business logic for long-term maintainability.
- Designed and structured relational database schemas with indexing and data integrity constraints.
- Developed and deployed new product features end-to-end and resolved critical production bugs to improve system stability.

Node.js Intern — *Jun 2024 – Sep 2024*
Robintel — *Isfahan, Iran | On-Site*

- Built backend services with Express.js, implementing routing, middleware pipelines, and RESTful API endpoints following team conventions.
- Collaborated with the product team to design application flows and database schemas for new feature development.
- Practiced Git-based workflows including feature branching, pull requests, and code reviews in a team environment.

Projects

SyncBoard – Real-Time Collaborative Workspace GitHub
TypeScript, NestJS, PostgreSQL, Prisma, Redis, RabbitMQ, Socket.IO, Docker, Jest, Nginx

- Built a real-time collaborative platform (Trello + Notion style) using NestJS modular monolith architecture.
- Implemented concurrent document editing with Operational Transformation (OT) over Socket.IO and scaled WebSockets horizontally via Redis Adapter.
- Designed an event-sourced audit log with PostgreSQL table partitioning and optimized queries using partial and GIN indexes.
- Integrated RabbitMQ with dead letter exchanges (DLX) and exponential backoff retry policies for reliable async notifications.

HamBaar – Package Delivery Platform GitHub
TypeScript, NestJS, PostgreSQL, Prisma, Redis, AWS S3, Docker, Jest, Turf.js

- Designed a scalable package delivery platform matching senders with compatible transporters using geospatial queries (Turf.js + Neshan Maps API) and dynamic pricing logic.
- Built JWT authentication with RBAC, Redis-backed session management, OTP verification, and secure file uploads via AWS S3 pre-signed URLs.

MenuChi – No-Code Menu Builder GitHub
TypeScript, Express.js, Prisma, PostgreSQL, Redis, AWS S3, TSOA, Docker, Vitest

- Built a no-code platform for restaurant digital menu management with hierarchical multi-tenant structure (restaurant, branch, menu, category).
- Implemented RBAC with Redis session handling and event-driven service communication using Redis Streams.

Bookstore API GitHub
TypeScript, NestJS, TypeORM, MySQL, Redis, Cron

- Designed a feature-rich bookstore API with normalized relational schema, dynamic query filtering and sorting, Redis caching, and real-time view tracking.
- Built a review system with reactions and threaded replies, and an order lifecycle with cart management and discount codes.

Education

Bachelor of Science in Computer Engineering *2021 – 2025*
University of Isfahan

Additional

Languages: English (Professional Working Proficiency) | Persian (Native)

Soft Skills: Team Collaboration, Ownership & Responsibility, Fast Learner, Adaptability
