## ABOUT

I'm a backend developer who genuinely enjoys turning real-world challenges into well-designed, usable products that people can actually benefit from. Beyond just making things work, I care deeply about software engineering principles — writing code that is structured, maintainable, and built to last. I believe the best work happens in collaborative environments where teammates support each other, share knowledge openly, and genuinely enjoy the process. Currently open to new opportunities and excited to join a team where I can grow, contribute, and help build something meaningful together.

## SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, Express.js, NestJS, GraphQL
- **Databases & ORMs:** PostgreSQL, Redis, MongoDB, Elasticsearch, Prisma, TypeORM, Sequelize, Mongoose
- **Database Architecture & Concepts:** Database Internals & Indexing, Query Optimization, Database Design
- **DevOps, Testing & Tools:** Git, GitHub Actions, Docker, Unit Testing, Integration Testing, Amazon S3, Swagger, RESTful APIs, Microservices (Basics), HTML, CSS, EJS

## EXPERIENCES

**Back End Developer** — **Droplinked** [Dec 2025 – Apr 2026]

*Abu Dhabi Emirate, UAE Remote*

- Refactored legacy code and migrated it to a new codebase.
- Refactored legacy services and core business use-cases onto the new codebase architecture.
- Designed and structured the database architecture.
- Developed and deployed new product features.
- Fixed bugs and resolved technical issues.

**Node.js Intern** — **Robintel** [June – September 2024]

*Isfahan • On-Site*

- Worked with Git workflows like feature branching.
- Built a backend project with Express.js using routing, middleware, and RESTful APIs.
- Helped to create app flows and database schemas for new features.

## PROJECTS

**HamBaar – Package Delivery Platform** [https://github.com/1mimhe/hambaar-backend]

*Tech Stack: TypeScript, Node.js, NestJS, PostgreSQL, Prisma, Redis, AWS S3, Docker, Jest, Turf.js*

Designed a scalable package delivery platform matching senders with compatible transporters using PostgreSQL/Prisma schema. Built JWT authentication with RBAC and integrated Redis for session management, OTP storage, and notifications. Implemented dynamic pricing and geospatial matching logic using Turf.js and Neshan Maps API. Utilized AWS S3 with pre-signed URLs for secure file uploads.

**Bookstore NEST API** [https://github.com/1mimhe/bookstore-nest]

*Tech Stack: TypeScript, NestJS, TypeORM, MySQL, Redis, Cron*

Designed a feature-rich bookstore API with normalized schema supporting books, authors, publishers, reviews, and collections and etc. Implemented filtering and sorting with dynamic queries, Redis caching, and real-time entities' views tracking. Built review system with reactions/replies and order lifecycle with cart management and discount codes.

**MenuChi - No-Code Menu Builder** [https://github.com/1mimhe/menuchi-backend]

*Tech Stack: TypeScript, Express.js, Prisma, PostgreSQL, Redis, AWS S3, TSOA, Docker, Vitest*

Built no-code platform for restaurant digital menu management with hierarchical structure (restaurant → branch → menu → cylinders). Designed scalable PostgreSQL schemas with Prisma, implemented RBAC with Redis session handling. Used Redis Streams for event-driven service communication.

**Agent-Central Monitoring System (Mini Project)** [https://github.com/1mimhe/monitoring-app]

*Tech Stack: Node.js, Express.js, Socket.io*

Built centralized monitoring system for multiple computers with three implementations: Node.js TCP and UDP Sockets, Socket.IO with real-time web interface, and REST API. All versions support system metrics and alerts. Socket.io version also have multi-room organization.

**Divar Clone** [https://github.com/1mimhe/divar-project]

*Tech Stack: Node.js, Express.js, MongoDB, EJS, Swagger*

Designed classified ads platform with MongoDB schema for categories, ads, and user interactions. Implemented search and filtering by city, category, and keywords. Frontend built with EJS template engine.

## EDUCATION

Bachelor's Degree in Computer Engineering [2021 – 2025]

University of Isfahan

## SOFT SKILLS

Teamwork • Responsibility • Fast Learner • Adaptability • Flexibility

## LANGUAGES

**English:** Intermediate (Professional working proficiency) • **Persian:** Native Language
